

Forcing your stations to show a blatantly political broadcast days before an election is just another example of why media consolidation is not good for America.

Sinclair uses the airwave space for free and therefore should be responsible to the public, not just to their own "bottom line"

What Sinclair is doing at this time shows why we need more control and oversight of ownership of TV and Radio stations.

Diversity is good. Local stations should be locally owned.

one group shouldn't have control over so many stations.
Thank you.
